Commands

Commands

User

- `/saw play` - If there is no current game going on, player is automatically sent into game & it begins. If there is a current game, they are added to the wait queue
- `/saw checkpoint` - Sends user back to their last checkpoint. If none is set, and error message is returned.
- `/saw cp` - sets current location has checkpoint. It is recommended that you limit this command to just signs rather than having users manually do it. (see planned features for checkpoint updates)
- `/saw quit` - If user is currently playing saw, this command will end their game

Admin

General

- `/sawadmin` - Show's current version
- `/sawadmin end` - Ends the current game. If there are users waiting, the next person in the queue will automatically start
- `/sawadmin clear` - Clears the waiting queue, but will not end current game
- `/sawadmin reload` - Reloads the plugin, restoring default values & config information. (See "Things To Know")
- `/sawadmin setup` - Takes you through setup process of setting key game points (required before gameplay)
- `/sawadmin update` - Shows you if there is an available update
